EvolutionTV™

Digital Video Recorder for your Mac

Watch and record TV on your Mac with EvolutionTV!

Featuring MPEG-2/4 and DivX hardware compression, EvolutionTV is the most advanced digital video recorder available for your Mac.

Delivering a clean and sharp picture, EvolutionTV comes with fully featured software enabling you to watch and record TV, schedule recordings, access Online TV guides and much more!

Thanks to its state of the art built-in video compression hardware, EvolutionTV will let you store hours of TV programs on a single DVD!

With EvolutionTV, now is the time to say good-bye to your VHS recorder!

Key Features

Watch and record full screen TV or video

Watch TV in window mode or full screen on your Mac. Your Mac will not be slowed down while recording thanks to EvolutionTV's built-in video compression technology.

MPEG-2 (DVD), MPEG-4 and DivX hardware compression!

EvolutionTV gives you a wide freedom of choice to record your TV shows. Use the universal MPEG-2 format or use MPEG-4 and DivX, the latest video compression technology.

Scheduled recording functionality and iCal integration

EvolutionTV allows to schedule recordings days or weeks in advance. Thanks to the tight integration with Apple's iCal, you can even schedule recording via your favorite calendar application.

Compatible with most Digital TV receivers

If you are already enjoying digital TV, simply connect your receiver box to EvolutionTV via S-Video and watch TV on your Mac!

Mac Compatibility

Mac with USB 2.0 connectivity

PowerPC G4/800 processor and higher

256 MB of RAM

Mac OS X 10.3.x and higher

Using an advanced video encoding chip, EvolutionTV lets you record your TV programmes in the most used formats.

The MPEG-2 format is ideal to create S-VCDs and DVDs without any additional software conversion step. Simply record, burn to disc and share with your friends and family.

Even better, you can choose to record to MPEG-4 and DivX! Finally, you will be able to store several movies on a single DVD in perfect quality! Of course, the video files generated by EvolutionTV are directly readable by most modern DVD players with MPEG-4/DivX support.

Using high quality components, EvolutionTV also guarantees you crystal clear stereo audio capture - Your movies will never sound the same again!

Capture Options with EvolutionTV

	MPEG-2	MPEG-4	DivX Portable	DivX Home
Extended Playtime	913 MB/h	470 MB/h	100 MB/h	470 MB/h
Balanced	1.8 GB/h	940 MB/h	256 MB/h	940 MB/h
High Quality	2.7 GB/h	1.8 GB/h	412 MB/h	1.8 GB/h

TitanTV Integration

EvolutionTV proudly integrates Decisionmark's TitanTV EPG (Electronic Program Guide) directly into the program. Decisionmark is the leading online EPG technology provider in the USA, offering you the most complete guide to what is on TV at your particular location.

Decisionmark's TitanTV EPG makes it easy to find your favorite shows and schedule them for recording or viewing with a single click.

iMovie Integration

With EvolutionTV you can record MPEG-4 files directly compatible with iMovie 5!
No need to go through an endless file conversion process when you import your recorded material in iMovie.
Simply open your movie and start editing!
